#### INTRODUCTION

This set of population reports was produced by the Planning and Development Department, Regional Plan Division, to compliment reports produced by the Ministry of Revenue, Assessment Division. The purpose of the exercise is to extend valuable information gathered annually by the Ministry by reformating basic census data into geographic areas of interest to Regional and Municipal Planners. Other researchers, particularly those with an interest in human service operations and planning, will find the reports useful, providing their areas conform to planning units. These units are called Planning Divisions and Neighbourhoods and are illustrated on maps preceding each section.

Reports have been designed to summarize specific combinations of age and sex by location, however, a computer file is also maintained as part of the system which can be used to produce other combinations. Those interested should contact the Regional Plan Division.

The tabulations in this report are organized into three sections as follows: Section 1 deals with Regional and Municipal totals, including a division between upper and lower escarpment in Hamilton; Section 2 groups Planning Divisions; and Section 3 groups Neighbourhood totals.

The data base for population figures recorded in this publication originates from the Ministry of Revenue's annual enumeration conducted in September. File copies are obtained by the Planning Department for the purpose of generating reports. These files are considered confidential by the Ministry, and are released for planning purposes with the understanding that no data will be released to the public, unless it has been aggregated so as not to identify individual records.

A minor discrepancy exists between information contained in this report and that released by the Ministry for the City of Hamilton. A difference of 439 persons is explained by the fact that a Ministry file copy for the year-end was used by the Planning Department instead of an October file used by the Ministry. The year-end file is used because it is required for other purposes by the City of Hamilton in their data processing systems. The year-end file differs from the October file because of regular file updates conducted by the Ministry. The official total released by the Ministry for the City of Hamilton is 312,162 persons.
